### LET US PROTECT YOU

Don't let your computer be vulnerable! Malicious software is always evolving in the form of viruses, worms, and spyware, threatening not only your computer but your private information as well.

On average, a new form of malware is created and dispersed every hour, making protection a constant task. Antivirus software is the first line of defense against these threats, and we are the second.

Sometimes even the best Antivirus Software (AVS) is not enough, some infections slip by and can cause tremendous damage. That's where we come in.

### TAMERS SMART CARE

Your computer is an investment whose management and security can be difficult and time-consuming. We save you the hassle and worry of protecting that investment in our comprehensive smart care plan.

**Our trained technicians work one-on-one with you** to help maintain your computer's health and performance, and resolve even the toughest issues. This service is personalized and local, you only get our best.

**Your system is safe with us, even when we're not there.** Without invading your privacy, we use the latest software to perform status reports on your computer's health remotely from our center 24/7, and automatically back-up your data.

**Keep it working fast.** Whether remotely or in-person, we keep your computer up-to-date with monthly maintenance and patch management services, giving you one less thing to worry about.
